

Amendments to the Claims

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (currently amended) A freight container having two access doors hingedly mounted at one end of the container via respective sets of hinges and mounting brackets which connect one edge of each door to a respective container door post;

characterised in that at least one hinge and corresponding mounting bracket have co-operating receiving ~~locations~~ holes arranged to receive a customs seal when the corresponding door is in a closed position such that when the seal is in engagement with the receiving holes the hinge is prevented from pivoting movement relative to the bracket.

2. (currently amended) A freight container according to claim 1, characterised in that one of the doors has an overlap with the other door, when both doors are in the closed position, and in that the hinge and corresponding mounting bracket provided with said co-operating receiving ~~locations~~ holes are arranged to mount said one door on the end of the container.

3. (previously presented) A freight container according to claim 1, characterised in that the hinge has an extended shoulder arranged to contact the door frame when the container is exposed to twisting (racking) forces during transportation, in order to protect the customs seal from damage during normal usage.

4. (currently amended) A freight container according to claim 1, characterised by provision of a frangible customs seal receivable by said receiving ~~locations~~ holes when the doors are in the closed position.
